about kotra

KOTRA, initially the Korea Trade Promotion Corporation, was established in 1962 as a national trade promotion organization. Since then, it has successfully facilitated Korea’s rapid export-led economic development through various trade promotion activities such as overseas market surveys and business matchmaking.

In August 1995, cross-border investment promotion and support for technological and industrial cooperation projects was added to KOTRA’s mandate, and it was renamed the Korea Trade-Investment Promotion Agency (KOTRA).

KOTRA currently operates Invest KOREA, the national investment promotion agency. Originally initiated as the Korea Investment Service Center (KISC) in 1998, the agency was relaunched as Invest KOREA in November 2003 to support foreign investors by offering more powerful incentives and an expanded range of services.

KOTRA is now well-equipped to pursue its twin mandates of trade and investment promotion to enhance national prosperity and competitiveness, with the ultimate goal of positioning Korea as the business and economic hub of Northeast Asia. With its long-term experience and expertise, KOTRA serves and assists all interested parties worldwide to do business with Korea.

In order to execute its mandates more efficiently, KOTRA has opened an extensive worldwide network of overseas Korea Business Centers. As of 2019, 126 Korea Business Centers are operating in 84 countries.

And to take maximum advantage of the era of E-Commerce, KOTRA launched the interactive Internet portal sites of INVEST KOREA Online in 2003 and BuyKorea in 2004, respectively.

KOTRA Academy was launched in 2003 as a professional learning center for international business. In the long run, KOTRA’s well-trained trade and investment manpower, armed with relevant theoretical and practical knowledge, will bolster the nation’s trade and investment infrastructure.

- Fever Coach / NFC Smart Thermometer

Fever Coach

Fever coach is the wearable typed-smart thermometer connected with mobile application based on NFC communication. It helps mom and dad to continuously monitor the temperature and timely provide the personalized guidance based on big data analysis regarding temperature, medication and symptom correlated to similar aged babies. The mobile application itself is already proven service which over 600K parents are using globally, so Fever coach bring out the way to measure smarter and easier. Let’s try out new way of measuring temperature.

How to use

Place the digital sensor
Deep on the armpit!

Digital Sensor
Art Technique company participated in the 2018 EXPO for Women’s Inventions hosted by the Korean Intellectual Property Office.

In this expo, silicon balloon feeding bottle ranked (semi grand prize) second among more than 400 patents worldwide and the silicon balloon pacifier won the gold prize.

Our products have better temperature maintenance than regular milk bottles. Silicon balloon feeding bottle is an effective bottle for babies who refuse to drink milk powder. Silicon balloon covers natural finger exercise and helps brain development by developing small muscles.

**Silicon balloon feeding bottle**

- Are you looking for a baby bottle that is good for digestion?

The digestion and absorption of a baby is greatly influenced by the temperature of the milk powder. Silicon balloon feeding bottle is a thick layer of air between the container and the silicone cover that keeps the contents warm and increases the rate of digestion absorption for babies with weak digestion.

**Silicon balloon teether**

- This product is the only patent in the world that is the only one in the world. Our company puts a silicone balloon in the teether part, so that when the baby catches the silicone balloon with the finger and use the teether part, it gives the emotional stability feeling like the end of the mother’s breast. This is a structure that can be held by the baby directly by putting a silicone balloon in the teeth development part, and it is very effective for normal teether by reducing the time spent on the mouth for a long.

**Silicon balloon pacifier**

- The high-tech silicone balloon used by Art Technique’s Amo Baby® has a net-like structure, so even if it comes in contact with a strong impact or sharp material on the outside, it does not burst like a rubber balloon easily. Not only will not be torn well, even if the baby bites, it has been improved so as not to be damaged easily.

Founded in 2016, JMINTL Co., Ltd. has been exporting products for babies and kids. With its own R&D department, JMINTL has developed WEGO and PRONTO based on its vast experience and know-how in producing such products.

PRONTO WAGON

PRONTO is a baby stroller with a nicely curved design. Accommodating two or more kids, it can be used as a bassinet, stroller, and a wagon. It provides different ways to travel with any family on the go, while giving children a comfortable place to rest, play, eat, sleep and relax. PRONTO is equipped with an easy folding system without removal of canopy or seats. It can also be folded within seconds into a compact package that can be transported easily.

Offering excellent flexibility and spaciousness compared to conventional strollers, it folds down smaller, thus securing more space in the trunk and the cargo. PRONTO is a product that can satisfy both design and function.

Laorganics公司产品全部使用天然的原料及最好的配方和安全的技术。

从儿童到成人是整个家庭都可以使用的产品品牌。

爱多氧 纯氧婴儿沐浴液&洗发液 300g

是滋润力优秀的沐浴和洗发二合一体验，PH5.7的弱酸性呵护娇嫩的宝宝肌肤。

爱多氧 纯氧婴儿香粉面霜 70g

涂后干燥柔软的香粉霜，无油腻使用方便。

产品使用后记

由于滋润的清爽，使用后宝宝的肌肤上出现了红色痘痘，平时使用的是别的品牌的湿纸和乳液也没有任何效果。

后来我又用了知名度很高的牌子，痘痘依然没有消，后来听到在网上看到爱多氧产品不仅能够解决宝宝的痘痘问题并且保湿效果也很好，所以去店之前购买了爱多氧品牌的产品。没想到我的宝宝真的渐渐找回了宝宝皮肤的健康状态。

We started this business from 1989 and are able to plan, design and produce hand-made children to adult shoes. Our company has consistent steady growth in its field and tried to provide the best quality shoes for customers.

Produce manually using domestic raw materials and materials.

Inside the kiln, the shoes are made using a pressure-and-heat-boiling process. Natural rubber prevents slipping and makes it easier to wear with a 5mm cushioned inner sole.

- **KZ** 鞋是价格合理的儿童鞋专门品牌，使用的所有原材料全是韩国的。制造工艺是手工艺及硫化成型工艺来做出鞋。使用天然橡胶来防滑使用5mm鞋底穿的更舒适，并且又为孩子而设计，考虑穿着感后进行生产。设计也可爱，并且独自穿脱也方便，是为孩子量身定制品牌鞋，所以是韩国30多年来一直深受欢迎。

- **DANDA** 鞋是高档品牌鞋，为男女老少所有人的品牌鞋。使用天然皮革和高级棉料来制作的，款式简洁又高档，不受性别和年龄限制的鞋，适合每个人。而且这又是全家人都能穿的品牌鞋。

NASPA BIRCH BUMPER BED

Three-function handmade bumper bed.
Remove the bumper to transform into a toddler’s bed and Playhouse!
If you remove the bumper, Toddler bed! Up to the play house!

For newborns...
A bumper bed is indeed necessary but cannot be used for a long time. However, we developed a bumper bed that can be used for a long time by making it transformable into a toddler’s bed by removing the bumper. With a playhouse design that fits well with children’s play area!

Till 7 years old ~!

NASPA DESIGN FURNITURE
Decorating a baby’s room is one of the most important things for expectant mothers. What to choose for decoration concept and what would be the best main color... Mothers believe that the very first thing parents can do for their baby on the way to the world is decorating the baby’s space beautiful and safe.

Furniture wonderful for decorating a baby’s room and that my baby can use safely. Children’s furniture not only childlike so mothers can feel close. And children’s furniture that will keep the story of youth as the baby grows up.

ROLL SKETCH PLAYHOUSE

For art play, which is one of the children’s representative plays, an easy-to-draw function has been added. Children can express their thoughts by drawing. It also contributes to the development of the right brain influencing sensitivity, sense, and creativity. Child’s space (emotional development) + art play (development of the right brain). It really catches two pigeons with one bean!
